SMALL PARCEL & BAGGAGE
X-RAY IMAGING SYSTEM

XRC 50-30SE

The **XRC 50-30SE** is one of the smallest tunnel sizes of the XRC baggage and parcel product range. It detects inorganic objects and provides an excellent image in an economical single energy (SE-Single Energy) diode array platform. It is a preferred model for locations with limited operating space.

Small handbags, packages parcels and cabin baggage are suitable for scanning. Institutions ensure that packages are inspected in places where inspection is required, such as courts, police departments, offices, shopping malls, prisons and hotels.
